
**LIVING TESTIMONY
IN THE FORM OF AN AFFIDAVIT**

I, Christine of the Massey family who's red thumbprint affixed of a flesh and blood living woman, live in the City of Peterborough [Peterborough County], Ontario, Canada, and am competent to testify as an expert to the facts and matters set forth herein.

My statements herein are based upon direct knowledge, unless I state same to be based upon information and belief, in which case I will set forth the source of same, which I verily believe to be true.

I am trained and have worked professionally in the past as a biostatistician, with a master's degree in biostatistics from the Dalla Lana School of Public Health, University of Toronto, Ontario, Canada.

In May of 2020, I began submitting "freedom of information" requests to Canadian health and science institutions, asking for all studies/reports in the possession/custody/control of each institution that describe the purification of the alleged "COVID-19 virus", also referred to as "SARS-COV-2", directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of genetic material.

I clarified in my requests that I was using the word "isolation" or "purification" in the every-day sense: the act of separating the alleged virus from everything else in a patient sample, and that I was not requesting records where "isolation of SARS-COV-2" refers instead to the culturing of something, or the performance of an amplification test (i.e. a PCR test), or the sequencing of something.

I explicitly clarified in my communications that the requests were not limited to records that were authored by the institution in question, or limited to records that pertain to work done by the institution in question.

In each communication, I also required that if any records held by the institution in question matched my description of requested records, but were currently available to the public elsewhere, that the institution provides enough information about each publicly available record so that I may identify and access each one with certainty.

In many of my requests I clarified that I was not requesting records that describe the replication of a virus without host cells.

After an alleged "variant" was first announced by Matthew Hancock, a man serving as "the U.K. Secretary of State for Health and Social Care" in December of 2020, and by Patty Hajdu, a woman serving as "Canada's Minister of Health" on December 20, 2020, many of my requests specified that they applied to any alleged "variants" as well as the original alleged virus.

I submitted 2 separate requests to the Public Health Agency of Canada. The first was as stated above. The 2nd request was specifically in regards to purification of the alleged "UK variant", which is also known as "the alpha variant" and also as "B.1.1.7".

I eventually submitted requests to 3 police service corporations as well: Aylmer Police Service (Ontario), Peterborough Police Service (Ontario) and Toronto Police Service. Thus far, I have received 22 responses from 21 Canadian institutions/service corporations.

The Public Health Agency of Canada (PHAC) provided me with 1 study that had been supported by Manitoba Health, Cadham Provincial Laboratory, the Public Health Agency of Canada and National Microbiology Laboratory, and with several emails that they claimed to be responsive to my request. In fact, neither the study nor the emails described purification of the alleged virus from a patient sample or from anything else. In response to my 2nd request to the Public Health Agency of Canada, I was advised that

they were unable to locate any records describing purification of the alleged alpha/UK variant from any patient sample. Of the remaining 20 Canadian institutions, all 20 stated that they have no such records **[Exhibit 1]**.

These include Health Canada (responsible for authorizing “COVID-19” clinical trials, diagnostic tests, “vaccines” and therapeutics), the National Research Council, Ontario’s Ministry of Health, Public Health Ontario (responsible for providing scientific and technical advice to clients working in government, public health, health care, and related sectors), Kingston, Frontenac, Lennox and Addington Public Health (KFL&A PH, while the current “Chief Medical Officer of Health for Ontario”, Dr. Kieran Moore, was still serving there as “Medical Officer of Health”) and all 5 Canadian institutions whose researchers claim to have “isolated” the alleged COVID-19 virus: the Vaccine and Infectious Disease Organization-International Vaccine Centre (VIDO-InterVac) at University of Saskatchewan, University of Toronto, McMaster University, Mount Sinai Hospital in Toronto and Sunnybrook Health Sciences Centre in Toronto.

On June 11th, 2020 at 11:42 AM Barbara Haase, Senior ATIP Analyst, Access to Information and Privacy, Health Canada advised me that Health Canada would not typically evaluate the type of information I had requested. On June 23rd, 2020 she stated that Health Canada’s role is only to review evidence provided by sponsors in order to make regulatory decisions to approve products and authorize clinical trials, and that I may wish to contact the sponsors of clinical trials and/or companies in order to get the information I was seeking.

In an email of February 2, 2021, Tammy Turpin-Loyer, Consultant, Access to Information and Privacy, Public Health Agency of Canada, stated that the gold standard used to determine the presence of intact virus in patient samples is visible cytopathic effects on cells in a cell culture, and that “PCR further confirms that intact virus is present”.

The 10 other Canadian institutions that stated they have no responsive records are: City of Toronto, Peterborough Public Health, Region of Durham Health Department, Region of Peel, Ontario, Grey Bruce Health Services, Grey Bruce Health Unit, Hastings Prince Edward Public Health and the 3 police service corporations.

Further, numerous people have provided me with documents that appear to me to be legitimate "freedom of information" responses from additional Canadian institutions/service corporations, in response to the same, or similar, requests for records describing purification of the alleged COVID-19 virus. In most cases I was provided the original, un-redacted communications, and redacted the name of the request-submitter myself, in order to protect their identity.

I have been provided 10 such communications, and in all cases the communication indicates that the institution/service corporation in question has no responsive records. These service corporations are: Natural Sciences and Engineering Research Council of Canada, Canadian Institutes of Health Research, Newfoundland Labrador Department of Health & Community Services, Institut National de Sante Publique du Quebec, British Columbia Centre for Disease Control, British Columbia Ministry of Health, British Columbia Provincial Health Services Authority, Vancouver Coastal Health Authority (re "the UK variant"), New Brunswick Department of Health and McGill University **[Exhibit 2]**.

All of the aforementioned responses regarding SARS-COV-2 purification are publicly available on my website: <https://www.fluoridefreepeel.ca/fois-reveal-that-health-science-institutions-around-the-world-have-no-record-of-sars-cov-2-isolation-purification/>

I, claim all here in said be true before my creator God under penalty of perjury.

Christine of the Massey family
